## AMS-PT HOPPER FED SHREDDERS Pierce & Tear Shredders

These hopper fed shredders can be used in conjunction with a strip cut shredder in order to produce a double cut that results in a smaller particle size.

The AMS-PT series shredders discharge onto a secondary shredder's in-feed conveyor and function as a pre-shredder in this application.

Shown with an AMS-4000 industrial paper shredder, this double cut system will produce a 5/8" wide x random length particle size. Additional sizes are available.

### Standard Features:

- Space saving versatility
- Turns an existing strip cut shredder into a double cut system
- Both shredders run independently for optimum functionality
