- **Simple set-up and operation**
- **Compact desktop design**
- **Up to 11" x 17" stock**

♔ STANDARD

PF-P280

The PF-P280 Folder from Standard delivers a new level of folding excellence and economics to churches, associations, nonprofits, and schools. It is designed to do one thing really well: produce single-folds on paper sizes up to 11"x17" that are the majority of folding requirements for church bulletins, newsletters, mailers, etc. But it doesn't do just half-folds…for those occasions where a letter or Z-fold is needed, the PF-P280 quickly and easily handles the job with a second pass through the folder

Unique Design

The PF-P280 has a single fold plate horizontally positioned under the feed table to reduce machine noise and minimize space requirements. Push button controls, LED indicator lamps, and simple fold-plate adjustment controls combine to allow the operator to quickly dial in the fold. The control panel also features a single sheet test feed button to assist the operator during set-up.

Economical. Simple. Quiet. Compact.

In simplifying the multitude of automatic folding styles offered on higher-priced folders, the PF-P280 focuses on doing one thing exceptionally well: producing a widely-used and popular single-fold at a price that is very reasonable. Combined with its ease of use, multi-fold capability, quiet operation, and compact size, it's the absolute best folder available for budget-minded users.

With one pass through the PF-P280, produce…

Half Fold

With two passes through the PF-P280, produce…

Letter Fold   *Z-Fold*   *Double Parallel Fold*   *Gate Fold*   *Engineering Fold*

Simple Maintenance
You can easily change the feed roller and separator pad. Tool-less removal of the fold roller makes cleaning or replacement a simple task.

Specifications
