ONYX 3-IN-1 PPS
(PICK-PUNCH-STACK)

Can reduce your punching project time over 60%!

Make your Onyx HD Punch twice as productive by getting the new APES & PAL SEMI-AUTOMATIC modules! APES stands for Automatic Paper Ejector & Stacker module. It punches, ejects and stacks in one continuous operation. And the PAL module stands for Pics-A-Lift and automatically lifts the number of sheets selected. In our initial tests, the Pics-A-Lift / APES-14 combo has outperformed many of the fully automatic punches and has done so at less than one-half of their initial cost.
