

Automatic L-Sealer Model 6700EX

The Clamco **6700EX** provides a generous 20" x 26" x 6"H seal area and a maximum 25 packages-per-minute throughput. Key features now standard on the **6700EX** include constant heat solid-seal knife sealing system with independent digital temperature controls for seal knives, upper film cradle with film splitter utilizing center-folded film up to 23" wide, and a film advance system with standard pinch rollers for film control and better economy.

The system also comes complete with Mitsubishi PLC control, self-aligning lower seal pads, fixed speed conveyors with product staging capability, vertical and horizontal product sensors, micro-perf perforators for uniform air evacuation, interlocked seal area guarding, emergency stop, and scrap removal system. Available options include closing conveyor for small package transfer ability.

MACHINE FEATURES

- > 20" x 26" x 6"H seal area
- > Production speeds up to 25 packages per minute
- > Constant heat solid seal knife sealing system
- > Mitsubishi PLC control
- > Independent digital temperature controls for seal knives
- > Self aligning lower seal pads
- > Manually adjusted centering guides for film roll holder
- > Upper film cradle with film splitter utilizing center folded film up to a max of 23" wide
- > Film advance system with standard pinch rollers for film control and better economy
- > Scrap removal system
- > Fixed speed conveyors with product staging capability
- > Vertical and horizontal product sensors
- > Micro-perf perforators for uniform air evacuation
- > Safety Interlocked Guarding for seal area
- > Emergency stop
- > Casters and levelers
- > One-year limited warranty
- > All parts, service, and support to be provided by Clamco Packaging

SPECIFICATIONS

- > 220V, 1 phase, 80 psi @ 1 cfm

OPTIONS

- > Closing conveyor

INDUSTRIES

- > Electronics
- > Food
- > Manufacturing
- > Publishing / Printing
