

One-to-One Book Production

SI-470

Book Thickness Measuring Device

The SI-470 is used to measure the book block thickness and transfer the thickness information into BQ-470V.

Features

1. The BQ-470V is the best suitable perfect binder to enable you to produce one-to-one ultra short-run book.
2. Each clamp and all book thickness related adjustments are made automatically in just seconds.
3. Book thickness information is entered via the Horizon SI-470 integrated caliper.
4. For longer production runs the BQ-470V is capable of operating at a cycle rate of 1,350 per hour.
5. Existing machines are easily upgradeable in the field by adding optional V-470S variable production software and SI-470 book thickness caliper.
6. A PUR option allows for the highest quality Photo and Memory Book production.

Specifications

Book Block Size (Top-Bottom x Fore-edge)	Max. 546(W) x 330(L) mm (21.49" x 12.99") Min. 145(W) x 105(L) mm (5.71" x 4.14")	Production Speed	190 - 670 books/hr. (Production speed varies depending on the thickness of series of variable sheet count book.)
Book Thickness	0.3 to 65 mm (0.015" to 2.560")		

*The machine design and specifications are subject to change without any notice.
